

Demo Ducker

Random audio ducking effect

Audio effect plugin by Raising Jake Studios

Thank you for purchasing Demo Ducker audio effect plugin! Demo Ducker provides automatic random dips in audio level to help protect your demos and other audio and video works in progress.

Demo Ducker is a 64-bit VST2, VST3 and AAX plugin for Windows and “Universal Binary” VST2, VST3, AU and AAX plugin for Mac OS 10.11 or higher on Intel and Apple Silicon.

INSTALLATION INSTRUCTIONS

Demo Ducker does not use an “installer” because we, ourselves, do not like stuff being put on our computer that we can’t see! So, installing Demo Ducker is simply a matter of unzipping, copying and pasting the appropriate files from the Demo Ducker purchased download folder to the proper folders on your computer.

All RJ Studios plugin files are “double zipped”. The top-level zip file (download) contains two sub-files for Mac and PC versions that are independently zipped. This was necessary to preserve the Pace iLok signatures for the AAX plugins for the respective OS systems. Please unzip the Mac or PC zip files before copying the desired plugin to your folders. Copying/dragging the plugin without unzipping first will not work, especially the AAX plugins.

FOR WINDOWS PC

To install the VST3 plugin: make sure your DAW is closed then copy the “Demo Ducker.vst3” file from purchased download file and save it to your VST3 plugin folder (typically C:\Program Files\Common Files\VST3). Restart your DAW and scan the plugins folder from your DAW’s plugin manager.

To install the VST2 plugin: make sure your DAW is closed then copy the “Demo Ducker.dll” file from purchased download file and save it to your VST2 plugin folder (typically C:\Program Files\Steinberg\VSTPlugins). Restart your DAW and scan the plugins folder from your DAW’s plugin manager.

To install the aaxplugin for Pro Tools: make sure your DAW is closed then copy the “Demo Ducker.aaxplugin” file from purchased download file and save it to your Avid plugin folder (typically C:\Program Files\Common Files\Avid\Audio\Plug-Ins). The plugin will be automatically scanned/added the next time Pro Tools is opened.

FOR MAC

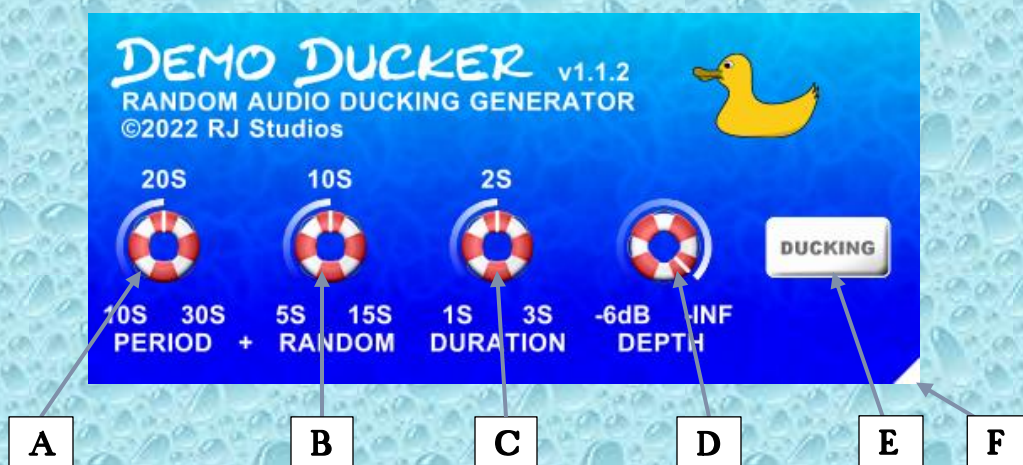

To install the VST2, VST3 and/or AU plugins, make sure your DAW is closed then copy the “Demo Ducker.vst” and/or “Demo Ducker.vst3” and/or “Demo Ducker.component” folders from the purchased

download file and save them the VST and/or VST3 and/or Component folders on your Mac under /Library/Audio/PlugIns.

NOTE: On Mac OS 10.13 and later a reboot may be required before AU plugins will show up in your DAW(s).

To install the aaxplugin for Pro Tools: make sure your DAW is closed then copy the “Demo Ducker.aaxplugin” file from purchased download file and save it to your Avid plugin folder (typically /user/Library/Application Support/Avid/Audio/Plug-Ins). The plugin will be automatically scanned/added the next time Pro Tools is opened.

Plugin Controls

A – Period – sets the basic amount of time in seconds between “ducks”.

B – Random – adds a random amount of time to the period ranging from a maximum of 5 seconds to a maximum of 15 seconds.

C – Duration – sets the total duration of the ducking gain reduction time from 1 to 3 seconds.

D – Depth – sets the amount of ducking gain reduction from -6dB to -INF(mute).

E – Process – effect process/bypass.

F – UI Resize control – click and drag to change the size of the plugin window. Double-click to reset.

HOW TO USE DEMO DUCKER

It is recommended that Demo Ducker be used as an “insert” for full effect on the final mix bus. The default settings work well for most applications but the controls can be adjusted as desired.

LICENSE INFO

By installing this software you agree to use it at your own risk. We do our best to thoroughly test our plugins before release but it is simply impossible to test every conceivable situation. We cannot be held responsible for any damages caused as a result of use of this product. If a problem arises please contact us with a description of the problem and as much information as you can provide (DAW, DAW version, OS and version, error messages, etc.).

Distribution:

You are not permitted to distribute the software without the developer's permission. You may use a copy on one laptop and one PC but "sharing" with others and duplication is prohibited. Paying for the software you use helps developers like us stay in business!

Updates: You are entitled to free updates until the next major version number. **Please retain your purchase download link and check for updates.** The developer makes no guarantee that this product will be maintained indefinitely.
