

# **De-Register**

## **RJ Studios Plugin De-Register App**

**DE-REGISTER** is a little app that will remove RJ Studios license codes from your machine to allow re-registration on a new machine (for computer upgrades, selling the plugin, etc.). The app does not remove the plugin files from your computer, only the license which allows easy re-instatement later if desired.

### **INSTALLATION INSTRUCTIONS**

No installation is necessary. Simply open the download file and click on the applicable app for your machine ("DeRegister.exe" on Windows or "DeRegister" inside DeRegister.dmg on Mac).

**NOTE:** Internet connection is required for the De-Register App to process your request. If your system is typically isolated from the internet for security or performance reasons you must connect temporarily to run this app.

## HOW TO USE DE-REGISTER

**STEP 1 – Open the App.** Each time the app is opened it will scan all of your RJ Studios plugins and show which ones are currently registered on your machine.

**STEP 2 –** Select the Active button next to the plugin(s) you want to release. The status will change to “Pending”.

**STEP 3** – Press the “DE-REGISTER” button and confirm Yes or Cancel

**STEP 4** – If processing is successful the status will show “License Codes Released” and the released license code(s) will be displayed.

**Step 5** – You can click on the released license code(s) and then right-click-copy and paste to your own text file, spreadsheet or anywhere else you would to save your released code(s) for your new machine/install.

The released license codes will only be displayed while the app is open. If the app is closed and then re-opened it will perform a new scan of your RJ Studios plugins and show

**the new status, i.e., the previously released codes will show blank and the Active button(s) will be greyed out.**

The released license codes are also saved to a text file on your machine.

On Windows the file is saved at  
**C:\\RJ\_Studios\_License\_Export**

On Mac the file is saved at:  
**Applications/RJ\_Studios\_License\_Export**

**These text files are generated each time the app successfully released one or more license codes.**

### IF YOU HAVE LOST YOUR LICENSE CODE(S)

If you purchased your plugins from the RJ Studios webstore you can access your license codes and download files at any time from this link:

<https://raisingjakestudios.onfastspring.com/account/>

If you purchased your plugins from a third party retailer please contact RJ Studios.

**DE-REGISTER** is a product of Raising Jake Studios ©2025
